

CLUB TIMES

Greetings to All,

I'm Allen Moody, the Director of Intellectual Activities until May 2027. Intellectual Activities covers most of our daytime offerings (with the exception of the luncheons), and includes instructional activities as well as games, and even a couple of exercise classes.

Our History Group brings in experts, both local and out-of-area, to lecture on both local and national history. Topics have included organized crime in Florida, the U.S. Constitutional Convention, and the history of manned spaceflight.

Current Events review things going on in the news, and you'll hear a variety of views expressed on what it all means—and whether it's a good thing, or not.

Like film? We have Documentary Cinema, Matinee Movies, and a Film Discussion group (and you'll get to see the movie before you discuss it!).

Into books? Check out the Non-Fiction, Fiction, Classic and Historical Fiction book clubs.

Want to know what's coming next? You can try our Technology Group or our Artificial Intelligence Group, and now, even a Quantum Mechanics Group.

Our Language Groups include intermediate and beginning Spanish, German conversation, as well as French, and Italian.

For managing your money, you can try our Investment Discussion Group.

Physical education offerings are Strength and Balance, and Tai Chi (the instructor of the latter does ask for a small fee).

Some people just come for the games. We do request a fee of \$70 for non-members. Check out Bridge, Mahjong, and Canasta.

Some of my favorites are Jeannie Schiff's Humanities group (which offers Great Courses content), Trivia 4U (help your team score the most points!), and Play Reading where you'll get the background on the playwright, as well as trying your hand at acting. Some of us ham it up more than others.....

This is not an all-inclusive list, but I think it shows that the University Club has something for nearly everyone. If we DON'T have some particular thing you want, ask me, and I'll see if we can make it happen.

Allen Moody

This lecture focuses on the development of better microscopes that have allowed us to see further and further into our world. These new tools have revolutionized medicine and given scientists whole new worlds to study. Well past the days of Galileo’s first attempted microscope, advancements now allow scientists to see as far as how atoms are arranged in a nanoscale object. Join us to see what we can see!
